DETAILED ACTION

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee. Authorization for this examiner's amendment was given in a telephone interview with Applicant's Representative: Stuart B. Shapiro on August 13, 2008.

The claims are amended as the following:

For the independent claim 1, on page 2 of the "claims" document dated 6/25/08, after the last limitation of limitation (a): "...identifying said table name and at least one networked partition containing said database table;"

add: " wherein step (a) further includes:

building a subset of the database catalog; and

storing the subset of the database catalog in the catalog cache."

cancel: claim 3

The following is an examiner's statement of reasons for allowance:

The prior art of record fails to teach the combination of limitations of independent claim 1, especially, "wherein said database catalog information includes partition maps associating table data with said networked partitions, and wherein a plurality of agent modules of at least one of said network processing nodes are each associated with a corresponding networked partition to establish a physical connection with, execute said query against and retrieve said desired data from that networked partition, the method comprising:

(a) providing a client query, including a table name of said database table containing said desired data and a partition key value, for said database at a network processing node in accordance with a user request to retrieve said desired data and retrieving information within said database catalog and storing the retrieved information in a catalog cache of said network processing node, wherein said retrieved information includes information identifying said table name and at least one networked partition containing said database table; wherein step (a) further includes: building a subset of the database catalog; and storing the subset of the database catalog in the catalog cache". The applied prior art does not fairly suggest the combination of teachings of the amended claim 1.

Dependent claims 4-6 incorporate the listed limitations by reference and contain limitations that further distinguish over the art of record. For these reasons, claims 4-6 are considered allowable over the art of record.
